

LAXMI ORGANIC INDUSTRIES LTD.

Enquiry to Order

E20

1 · Purpose & Scope

What this SOP covers and who it applies to

Purpose

This SOP defines the end-to-end process from customer enquiry receipt through to confirmed Sales Order (SO) creation in SAP. It covers all enquiry channels, both LOIL and LOBV business units, new and existing customer flows, and the Quick Repeat Order fast-track path.

Scope

- All enquiry channels: Email, Phone, WhatsApp (WABA), Customer Portal
- Both business units: LOIL (domestic and export) and LOBV (export)
- New customer onboarding and existing customer order flows
- TO-BE target-state process design
- Systems: CRM, SAP, TMS, WABA

2 · Glossary of Terms

Key terms and abbreviations

Term	Meaning
CRM	Customer Relationship Management system — primary system for enquiry to order workflow
SAP	ERP system used for final Sales Order creation, billing, and master data
WABA	WhatsApp for Business Account — official channel for customer enquiries
SO	Sales Order in SAP — the confirmed order record
PO	Purchase Order from customer — formal acceptance of the offer
Floor Price	Minimum selling price per product, maintained by Marketing in CRM
BU Head	Business Unit Head — approves below-floor pricing exceptions
MDM	Master Data Management team — handles customer creation in SAP
OCR	Optical Character Recognition — auto-reads uploaded PO documents (~70% accuracy)
GSTIN	GST Identification Number — mandatory for Indian customer creation
INCO Terms	Delivery risk and responsibility point (e.g., FOB, CIF, DDP)
T1 / T2	LOBV sale types: T1 = direct sale, T2 = transit sale
Credit Limit	Maximum outstanding amount, controlled at parent customer level in SAP
GDPR	EU data protection law — mandatory consent before capturing LOBV customer data
Proforma Invoice	Export document — quotation renamed for international customers

3 · Process Flow and Step-by-Step Procedure

Diagram followed by detailed actions for each step. Green = automated · Amber = manual · Red = blocker

Green = automated. Blue/amber = manual. Dark = system action.

STEP 01

Enquiry Receipt

System: CRM / WABA / Web Form / Email

All flows — Step 1

Step 1 — Enquiry Receipt | TO-BE — LOIL

WABA + web form: fully automated, auto-ack on all channels

Email: Sales sends standard template OR creates manually in CRM

Phone: Sales creates manually in CRM after call

Existing customer on web form: dropdown + Product/Pkg/Qty/INCO mandatory

Time: 10 min -- 5 min

Step 1 — Enquiry Receipt | TO-BE — LOBV

GDPR consent is Step 0 — entire flow blocked without it for LOBV

T1 = direct sale to end customer · T2 = transit through intermediate country

LOBV now on CRM for first time — previously zero visibility

T1/T2 not given -- Sales must go back to customer before proceeding

What to do

- WABA / Web Form enquiries: auto-captured in CRM — review and confirm
- Official Email: create Enquiry manually in CRM immediately after receiving
- Phone Call: capture all details, create Enquiry manually in CRM after the call
- Mandatory details: Product, Quantity, Delivery Location, Expected Delivery Date, Packaging Type
- New customer (web/WABA): also capture Full Name, Ship-to location, Email, Phone
- CRM auto-assigns enquiry to mapped Sales Executive; customer receives auto-acknowledgement; SLA timer starts

LOBV only

- Obtain GDPR consent in CRM before capturing any data — the entire flow is blocked without it
- Capture T1 or T2 sale type requirement from the customer

Note: If enquiry reaches an unmapped Sales Executive, contact MDM to update the SAP customer-sales mapping before proceeding.

What to do

- Auto-captured enquiries (WABA / Web Form): open CRM, review auto-created record, CRM auto-pulls from SAP: Sales Exec, INCO Terms, Ship-to, Payment Terms
- Manual enquiries (Email / Phone): click New Enquiry, select parent customer, fill all mandatory fields
- Review all auto-filled fields and add or correct any missing inputs
- Select pipeline: Existing Customer or New Customer (triggers onboarding at Closed WON)
- Save Enquiry — status updates to Open; CRM changes auto-sync back to SAP

LOBV only

- Select T1 or T2 sale type, confirm Packaging Type and INCO Terms — all mandatory to save

Note: New customer, new product, or new salesperson combination: all fields must be entered manually.

STEP 03**Offer Creation and Floor Price Validation**

System: CRM

Step 3 — Offer Creation | TO-BE — LOIL & LOBV

Floor price maintained by Marketing only — hidden from Sales

LOBV: T1/T2 + packaging + INCO mandatory - Rebate, ISCC compliance, tanker upsizing, same-day delivery cost all captured

Floor price is a hard system control — not advisory

Basic price = Netback + freight master + packaging master (both maintained in CRM)

Separate PO condition fields: ZPRO (Basic Price), ZFRE (Freight)

Time: 10 min -- 5 min

What to do

- Open saved Enquiry and click Create Offer — unique Offer ID is auto-generated
- Enter Netback Price; system auto-calculates Basic Price using Freight and Packaging masters
- Fill: Taxes, Discounts, Validity Period, Schedule Date, Rebate terms, Compliance fields
- For same-day delivery: enter additional delivery cost in the dedicated field

Floor Price validation (automatic)

- At or above Floor Price: offer proceeds without any approval needed
- Below Floor Price: BU Head approval workflow triggers in CRM — enter justification; share offer only after approval is received

Note: Floor Price is maintained by Marketing only — not visible or editable by Sales.

STEP 04**Offer Negotiation (Closed WON or Closed LOST)**

System: CRM / Email / WhatsApp

Step 4 — Offer Negotiation | TO-BE — LOIL & LOBV**Exports: Final offer must include compliance documents before sharing**

AAH certification · M-Form for Nigeria · Other country-specific compliance docs

Key rules

Revised offer: same enquiry + same product only · New product = new enquiry · Below floor → BU Head approval required · Time: 30 → 10 min

TO-BE: CRM direct send OR PDF via Outlook — both options available

Auto follow-up after 2-3 days · Auto-closure after 2 unanswered reminders

Full version history via unique Offer IDs per revision

What to do

- Send offer directly from CRM, or download PDF and send via Outlook or WhatsApp
- No response within 2-3 days: CRM auto-sends follow-up reminder
- After 2nd unanswered reminder: CRM auto-closes enquiry as Closed LOST
- Customer requests revision: create revised offer under same Enquiry and same Product; new Offer ID generated
- If revised price below Floor: BU Head approval required again before sharing
- Customer accepts: mark Closed WON in CRM and proceed to Step 5
- Customer rejects: mark Closed LOST — enquiry is closed

Export compliance

- Final offer must include: M-Form (Nigeria), AAH certification, and other country-specific compliance documents

Note: Revised offer allowed only for the SAME product under the SAME enquiry. New product requires a new enquiry.

STEP 05**Quotation Creation**

System: CRM

TO-BE — LOIL & LOBY

All fields auto-pulled from last approved offer · Zero data mismatch · Proforma auto-emailed for exports · Time: 5 → 0 min

Fully automated — manual quotation entry eliminated · Zero data mismatch risk — pulled directly from approved offer · Exports: Proforma Invoice auto-generated and emailed to customer

What to do

- On Closed WON: CRM auto-generates Quotation from the last approved offer
- All fields auto-pulled: Price, Taxes, Discounts, Validity, Packing, Payment Terms, INCO Terms
- Unique Quotation ID is generated
- Export orders: document is auto-renamed Proforma Invoice and emailed to customer
- Review all auto-populated fields for accuracy and confirm to finalise

STEP 06**PO Receipt, Draft SO Creation and SAP Transmission**

System: CRM / SAP

Step 6 — PO Receipt, Draft SO & SAP Transmission | TO-BE**Step 6 — Sub-flows | SO Change Management & Direct PO****Sub-flow A — SO Change Management****Sub-flow B — Direct PO without prior Enquiry**

Direct PO: all OCR validation + CS correction rules apply same as standard flow Sales must confirm enquiry draft before SO conversion — cannot be skipped

What to do

- Accept PO only via official channels: Official Sales Email, Customer Portal, or Official WhatsApp
- Attach PO document and any compliance docs (LC, M-Form) to the relevant Quotation in CRM
- CRM OCR auto-extracts: Customer, PO Number, Material, Qty, Price, Delivery Date, Address (~70% accuracy)
- Verify and correct ALL OCR-extracted fields strictly against the original PO
- Create Draft SO: one ship-to location = one SO; multiple ship-to locations = one SO per location
- Scheduled delivery line items with dates are mandatory
- Capture both Customer Requested Date and Laxmi Promised Date
- If dates differ: system auto-emails customer with both dates
- Validate all details, click Send to SAP — CRM auto-creates final SO in SAP
- Sales Head receives email notification; customer receives order confirmation via email or WhatsApp

Note: Direct PO (no prior enquiry): attach PO in CRM, system creates Enquiry draft, Sales confirms, Draft SO pushed to SAP.

STEP 07**Customer Onboarding (New Customers Only, triggered at Closed WON)**

System: CRM / SAP

Step 7 — Customer Onboarding (New Customer) | TO-BE**LOIL — TO-BE****LOBV — TO-BE**

GDPR consent mandatory — entire flow blocked without it | Export credit risk + bank/branch validity checks are LOBV-specific

New Customer — Complete End-to-End Process**Phase 1 — Enquiry from new customer****Phase 2 — Offer to Closed WON****Phase 3 — Onboarding (runs parallel to quotation)**

Payment terms auto-copied · Parent-child credit hierarchy · Head Office field for group reporting

Finance must update credit from INR 1 before high-value orders · LOBV: bank + branch validity required

Phase 4 — Quotation + SO (standard existing customer flow resumes)**What to do**

- Auto-triggered when offer is marked Closed WON for a new customer
- CRM auto-sends onboarding form link; customer fills: Company Name, Email, Phone, Address, GSTIN, PAN, TCS certificate
- GST and PAN numbers are auto-fetched when customer uploads certificate documents
- Sales confirms: new customer or new Ship-to Party only? If Ship-to Party only, map to existing Sold-to Parent before submitting

- CRM validates GSTIN via GST Portal API — invalid GSTIN blocks creation
- Valid GSTIN: SAP auto-creates customer and extends to Sales, Finance, Credit Mgmt roles
- Credit limit set to INR 1; Welcome email auto-sent; BU Head and Finance notified to set final credit limit
- Parent-child credit hierarchy applied automatically
- Once onboarding complete: resume from Step 5 for Quotation and SO

Note: LOBV: Export credit risk checks and bank validity verification are mandatory before customer creation.

4 · Quick Repeat Order — Fast Track

For existing customers ordering via call or WhatsApp (skips Steps 1-5)

Quick Create PO — Fast Track | Existing Customer | Repeat Order via Call / WhatsApp

TRIGGER: Existing customer contacts Sales via Call or WhatsApp with Product + Quantity + Price

SKIPS: Enquiry creation, Offer PDF, Quotation stage | Use ONLY for genuine repeat orders with known price
For new product / new price negotiation / new ship-to / new customer -> use full E2O Steps 1-7
Floor price check still applies | BU Head approval required if price < Floor Price

When to use

- Customer is an existing active customer with a valid code in SAP and CRM
- Order received via salesperson call or WhatsApp
- Customer specifies all three clearly: Product, Quantity, and Agreed Price
- Same product and delivery location as a previous order (genuine repeat)

Fast-track steps

- Open CRM and navigate to the existing customer account page
- Click the QUICK CREATE PO button
- System auto-fills: Customer details, last-used product, delivery address, payment terms from SAP
- Confirm or update: Product, Quantity, Agreed Price, and Delivery Date
- At or above Floor Price: proceed. Below Floor: BU Head approval required first
- Attach WhatsApp screenshot or call note in CRM as the PO reference document
- Click SUBMIT — CRM auto-creates Draft SO and pushes to SAP
- Customer receives auto order confirmation; Sales Head receives notification

This fast-track skips Steps 1-5. Use ONLY for genuine repeat orders with known product, quantity, and agreed price. For new product, new price, new ship-to, or new customer: use the full E2O process.

5 · Exception Handling

What to do when things don't follow the standard flow

Situation	Action	Owner
PO received without prior enquiry	Attach PO in CRM. System creates Enquiry draft. Sales confirms. Draft SO created and pushed to SAP.	CS / Sales
Offer price below Floor Price	BU Head approval workflow triggered in CRM. Sales enters justification. Share offer only after approval.	BU Head + Sales
GSTIN validation fails	Error shown in CRM. Customer creation blocked. Customer must correct GSTIN and resubmit.	MDM
Customer Requested Date differs from Laxmi Promised Date	CRM auto-emails customer with both dates. CS follows up for acknowledgement.	System + CS
SO change required after SAP creation	CS updates Draft SO in CRM. Sales Manager approval workflow. Push updated SO to SAP. Customer auto-notified.	CS + Sales Manager
Enquiry received by unmapped Sales Executive	Contact MDM to update customer-sales mapping in SAP. Reassign enquiry after update.	MDM
Customer blocked in SAP (credit or overdue)	System alert in CRM. Escalate to Finance for credit review. Do not proceed until block is removed.	Finance + Sales
LOBV: GDPR consent not obtained	Do not capture any customer data. Send GDPR consent form first. Proceed only after explicit consent.	Sales

6 · Quick Reference — What Do I Do When...?

Fast lookup for common situations

Situation	What to Do	Steps
A customer emails an enquiry	Create Enquiry in CRM. Verify existing or new customer. Fill all mandatory fields and save.	Steps 2 to 6
A customer calls or WhatsApps	Capture all details immediately. Create Enquiry manually in CRM.	Step 1 then Step 2 onwards
A customer asks for a price quote	Open Enquiry in CRM. Create Offer. Enter Netback Price. System validates against Floor Price. Share.	Steps 3 and 4
A customer wants to revise price	Create revised offer under same Enquiry and same Product. New Offer ID. Update price and terms. Re-share.	Step 4
A customer accepts the offer	Mark Closed WON in CRM. CRM auto-generates Quotation. Await PO. Push Draft SO to SAP.	Steps 5 and 6
A customer rejects the final offer	Mark Closed LOST in CRM. Enquiry is closed. No further action.	Step 4
A customer sends a Purchase Order	Attach PO to Quotation in CRM. Review all OCR-extracted data. Correct all errors. Push Draft SO to SAP.	Step 6
The customer is new	Follow normal flow. On Closed WON: onboarding form auto-sent. Once GSTIN validates, resume from Step 5.	Steps 1-5, then Step 7, then Step 6
A repeat order via call or WhatsApp	Use QUICK CREATE PO in CRM. Fill product, quantity, price, delivery date. Attach note. Submit.	Section 5 Fast-Track
Offer price is below Floor Price	Do not share. Enter justification in CRM. Submit for BU Head approval. Share only after approval.	Step 3 exception path
A PO arrives with no prior enquiry	Attach PO in CRM. System auto-creates Enquiry draft. Sales confirms. Draft SO pushed to SAP.	Step 6 Direct PO sub-flow
SO in SAP needs to be changed	CS updates Draft SO in CRM. Sales Manager approval if required. Push updated SO to SAP. Customer notified.	Step 6 SO Change Management
